As experts in measurement technology we also develop special products on request besides our off-the-shelf products for your special applications. Since the costs and rights for the development are on our side, these products usually depend on the number of pieces you order.

In case of integration in other products or branding the product responsibility (e.g. CE, ElektroG, ROHS, WEEE) for the bmcm product concerning installation, use and waste management devolves to the customer.

Examples for Special Products:

- Various connector boards
- Digital counters
- Serial interface cards
- Cable test system
- Carrier boards
- Test boards
- Power supply controls
